

MALAYSIAN TECHNICAL COOPERATION PROGRAMME (MTCP)

Smart
Farming &
Precision
Agriculture

24-28 JUNE 2024

MULTIMEDIA UNIVERSITY

“A Programme Designed
Towards Sustainable
Food Security”

About MTCP

The Malaysian Technical Cooperation Programme (MTCP) was initiated at the First Commonwealth Heads of Government Meeting (CHOGM) for the Asia Pacific Region held in Sydney in February 1978. It was officially launched on 7th September 1980 at the 2nd CHOGRM in New Delhi, India to signify Malaysia's commitment to South-South Cooperation, in particular Technical Cooperation among Developing Countries (TCDC).

The MTCP emphasizes the development of human resources through the provision of training in various areas which is essential for a country's development. These areas include diplomacy and diplomatic practices, economy, good governance, education, tourism, environment, social development, halal industry, safety and security as well as technology among others. As of 31st December 2023, 37,815 participants from 144 recipient countries have benefited from the various programmes offered under the MTCP.

About CENERGY

We believe that the future is full of endless possibilities. With our expertise and resources, we're committed to reach individuals and organizations unlock their potential and be future-ready. Being future-ready is not just about keeping up with technological developments, but about embracing change and taking bold steps towards progress. That's why we work closely with our clients to develop innovative solutions that drive positive impact for society. As a subsidiary of Multimedia University (MMU), we have the strength and support in the industry and academic. We leverage our partnerships with academic institutions, government agencies, and industry partners to create unique and comprehensive solutions that set our clients apart. Our core theme, "Future Ready You," encapsulates our unwavering commitment to empowering individuals and organizations to thrive in the face of an ever-evolving future. We offer a diverse range of consulting services, research and development initiatives, and corporate training programs designed to keep our clients ahead of the curve. While we recognize the importance of technology, we firmly believe that true progress lies in people. At CENERGY, we prioritize creating a better future for all, where innovation and progress go hand in hand with positive societal impact.

About the Course

Farming has been the oldest sign of human civilization. Through time, the human race developed several damaging ways of growing crops which affects the environment. In order to solve this problem, smart farming through Internet of Things (IoT) is developed not only to preserve nature but to also bring more benefits such as higher profit, efficient planting process, premium harvest and others. The digitalization of agricultural practices combined with the latest technology can transform the agricultural sector. Applying Agriculture 4.0 solutions across the value chain can lower the cost of importing food products, enrich the lives of agriculturalists, shrink wastages, enhance sustainable practices, and improve yield and supply chain efficiency.

Course Content

- Day 1: Indoor Smart Farm
- Day 2: Introductory Python
- Day 3: IOT Sensor Node Workshop
- Day 4: Gateway & Dashboard Workshop
- Day 5: AI & Machine Learning Workshop

Course Methodology

Actionable Plans

Develop actionable plans or strategies for implementing precision agriculture practices in their farms and agricultural operations.

Practical Experience

Practical experience and exposure to precision agriculture equipment, sensors, and technologies through hands-on training and demonstration.

Case Studies

Real-world case studies and examples of successful precision agriculture implementations in various agricultural settings.

Targeted Participants

Eligibility criteria for admission:

- Government officials/Professionals in agriculture, agribusiness, or related fields.
- Must be 50 years of age or below.
- Priority will be given to applicants who have never participated in the MTCP course conducted by MMU.
