

167th International Training Programme on Information Systems Audit 07th to 23rd January 2026

Course on Information Systems Audit

As governments increasingly adopt IT-driven platforms, auditors must develop strong Information Systems Audit skills to address challenges like data security, integrity, privacy, and cybersecurity risks. Staying updated with advanced tools and techniques is crucial. Emerging technologies such as AI and ML offer significant potential to enhance audit depth and efficiency. This training programme is designed to build these critical competencies, enabling auditors to conduct robust and future-ready Information Systems Audits.

This course offers the following:

- Covers key IS governance frameworks including CoBIT and ISO standards (27000, 38500, 20000)
- Structured training on the IS audit process based on GUID 5100
- Practical exercises on IT system audits and system acquisition/development
- Data analytics tools like Power BI, Tableau, and KNIME for audit purposes
- Use of AI and ML in audits through real-world case studies
- Online certification in data analytics

Programme Eligibility

- Senior and middle level officers of various SAIs
- Experience of at least 3 years in the auditing field preferably IT Audit
- Fluency in spoken and written English
- Age between 25 to 45 years

What is so fascinating about the course

- Careful and creative content design
- Strategic selection of faculty from wide and diverse group representing officers from SAI, India, academicians from institutes of international repute, expert professionals in the relevant fields, global organizations etc.
- Our programmes are thought-provoking, informative, engaging and aspirational.

Highlights of Delivery of Course Module

- Focus on emerging trends & international best practices
- Hands-on-sessions
- Case Studies & Group Works
- Country Papers and Theme Country Day
- Study Tours and field visits
