

INTEGRATED WASTE MANAGEMENT FOR CIRCULAR ECONOMY

18 TO 22 MAY 2026

Sponsored by the

SINGAPORE COOPERATION PROGRAMME

under the

SINGAPORE COOPERATION PROGRAMME TRAINING AWARD

Singapore Cooperation Programme

Singapore has provided technical assistance to other developing countries since the 1960s. As a country whose only resource is its people, Singapore believes that human resource development is vital for economic and social progress. Singapore itself has benefited from training provided by other countries and international organisations.

In 1992, the Singapore Cooperation Programme (SCP) was established to bring together under one framework the various technical assistance programmes offered by Singapore. Through the SCP, the range and number of training programmes were increased to share Singapore's development experience with other developing countries.

To date, over 160,000 officials from more than 180 countries, territories, and intergovernmental organisations have participated in our courses and study visits. The SCP is managed by the Development Partnerships Directorate of the Ministry of Foreign Affairs, Singapore.

Course Objectives

The course will address environmental sustainable development with focus on circular economy and the importance of promoting integrated solid waste management strategies for creating environmental sustainable local and regional solutions in the context of policy, planning, practice, and innovation to advance a circular and sustainable materials management approach to optimize resource efficiency, recovery and reuse for socio- economic and ecological benefits.

Synopsis

Topics to be covered include:

- Sustainability and sustainable pathways
- Waste-to-Energy, Waste-to-Resource and Circular Economy
- Promote the understanding of circular economy and its linkages and impact on smart cities development
- Introduce tools and resources Singapore used to address solid waste and plastic pollution
- Identify strategies and coordination mechanisms for multi-stakeholder interventions
- Industry practices, innovation and financial/business models for resource recovery and reuse of solid waste
- Urban development, SDGs and relevant targets.

Methodology

The course will be conducted in-person in Singapore and will include the delivery of course sessions, case studies, country presentations as well as group discussions.

Course Duration and Venue

The course will be held over five days from 18 to 22 May 2026 in Singapore.
