About the Organizer	<p>The Academy for International Business Officials (AIBO) is an educational and training institution directly under the Ministry of Commerce of the People's Republic of China. Established in 1980, AIBO is located in Changping District, Beijing, about 30 kilometers from Beijing Capital International Airport. It boasts comprehensive infrastructure to provide services such as accommodation, catering, training and meetings for trainees.</p> <p>One of the main responsibilities of AIBO is to implement human resources development and cooperation projects, especially training courses for officials. The Academy serves as the main base for China's foreign aid training, offering both off-line and on-line training in China and overseas.</p>		

	<p>Backed by the Ministry of Commerce and in close cooperation with China's top think tanks, research institutes and universities, AIBO brings together a large number of China's top experts and scholars to provide intellectual support for foreign aid training. It has developed a number of high-quality foreign aid training projects in the fields of trade and investment, international economic cooperation, governance and public management, which have proved to be fruitful.</p> <p>Since 1998, AIBO has successfully held over 2,000 training sessions for officials from developing countries (including 131 ministerial seminars), benefiting nearly 70,000 trainees from other developing countries around the world.</p> <p>AIBO will adhere to the guidance of Xi Jinping Thought on Socialism with Chinese Characteristics for a New Era, and take the important concepts, including a community with a shared future for mankind, pursuing the greater good and shared interests, and sincerity, real results, amity, good faith, mutual benefit and inclusiveness, as strategic guidance and fundamental principles to be followed. It will facilitate the joint efforts in implementing major initiatives such as the Belt and Road Initiative (BRI) and the Global Development Initiative (GDI), and continue to help developing countries accelerate their development by sharing China's experience and programs.</p>
<p>Training content</p>	<p>Background: With the Global Development Initiative leading the way ahead, profound changes unseen in a century are unfolding across the world. Economic recovery remains challenging, while the trend of global re-industrialization converging with digital technology is becoming more pronounced. China is ready to join hands with other countries to seize the opportunities presented by the scientific and technological revolution, leverage digital technologies to empower traditional industries, drive the digital transformation of industries, and rebuild new competitive advantages.</p> <p>Industrial collaboration and new industrialization are among the top concerns for developing countries and are integral parts of both the Global Development Initiative and the UN's 2030 Agenda for Sustainable Development. President Xi Jinping has repeatedly interpreted China's insights and shared its experiences at significant events, promoting global industrial cooperation and new industrialization. For 14 consecutive years, China has held the position as the world's largest manufacturing country. Guided by a people-centered development philosophy, China has explored a path of industrial growth through the formulation of industrial policies and the comprehensive use of various policy tools for digital transformation and smart manufacturing. This journey provides valuable case studies and practical examples for developing countries pursuing new industrialization.</p> <p>Purpose: This seminar aims to implement the Global Development Initiative by sharing China's experiences in new industrialization and the development of new quality productive forces. Through an analysis of paths for digital transformation, it seeks to capture early opportunities in industrial revolution and enhance strategic planning capabilities. It also aims to establish an international cooperation platform to deepen the integration and alignment of industries and new industrialization among developing countries. Together, we can explore high-quality development pathways and collaboratively promote global economic recovery and sustainable development.</p> <p>Content: The seminar's topics will primarily cover an overview of China's national conditions, the governance philosophy of Chinese leaders, the Global Development Initiative and a community with a shared future for mankind, reform and opening up and Chinese modernization, an overview of China's industrial development and upgrading,</p>

	<p>the course of China's industrialization and its relevance to developing countries, trends in new industrialization and global manufacturing, manufacturing empowering by 5G + industrial internet, and investment facilitation within the framework of a multilateral trading system.</p> <p>Methods: Invite experts in related fields to give special lectures on different themes; organize discussions and exchanges between participants and experts and among trainees; and organize participants to pay field visits to relevant organizations and enterprises in Beijing and other cities.</p>
